

CATEGORIES OF REVENUES & EXPENDITURES

REVENUES ARE DIVIDED INTO THE FOLLOWING CATEGORIES:

A. Taxes - The State of Florida does not have a state or local income tax. Specific types of taxes levied by local government include ad valorem (real and personal property), and sales and use taxes (imposed upon sale or consumption of goods and services levied locally). Sales and use taxes imposed by county government include the tourist development taxes, and local option gas taxes. Property tax revenue estimates are based on certified property valuations. Sales and use tax revenues are based on history and state provided estimates.

Franchise fees are also accounted for in this category. These fees may be levied on a corporation or individual by the local government in return for granting a privilege or permitting the use of public property subject to regulations. The State collects fees imposed under the Telecommunications Act and disperses them to participating counties. The County also collects electrical and solid waste franchise fees. Revenue estimates are based on history and customer base projections.

B. Licenses and Permits - These revenues are derived from the issuance of local licenses and permits. Within this category are professional and occupational licenses, building permits and any other licenses and permits (e.g., building, roofing, plumbing permits; occupational license fees). Revenue estimates are based on prior year collections.

C. Intergovernmental Revenues - Included are revenues received from federal, state and other local governmental sources in the form of grants, shared revenues and payments in lieu of taxes. The state shared revenues that are of most importance to county government are revenue sharing, mobile home licenses, alcoholic beverage licenses, racing tax, local government half-cent sales tax, constitutional gas tax, and county gas tax. The state provides revenue estimates, except for grants; grant revenues are estimated based on information provided by grantors.

D. Charges for Services - These revenues include all charges for current services such as recording of legal documents, zoning fees, county officer fees (fees remitted to county from officers whose operations are budgeted by the Board of County Commissioners), county court fees, circuit court fees, water utility, garbage/solid waste, sewer fees, park, library and recreation fees. Revenue estimates are based on revenue history and operating agency projections.

E. Fines and Forfeitures - This group of revenues includes moneys received from fines and penalties imposed for the commission of statutory offenses, violation of lawful administrative rules and regulations or for neglect of official duty. Some examples include court fines, library fines, and pollution control violations. Revenue estimates are based on revenue history.

F. Miscellaneous Revenues - Monies in this category are primarily interest earnings. Types of interest earnings include moneys on investments, contracts and notes, interest earnings of the Clerk of Court, Tax Collector, Sheriff, Property Appraiser and Supervisor of Elections. Also included would be rents and

proceeds for use of public property. Revenue estimates are based on history and analysis of fund balances.

G. Internal Service Charges - The Risk Management program generates revenue to fund the program by billing the departments for services provided. Revenues are determined by agency requirements, which are determined in the budget review process. The expenditure to the department is an example of an Internal Service Charge. The use of an internal service fund enhances cost accounting and accountability for this in-house service; however, since expenditures are counted in both the originating department and and in the internal service fund, this results in a double count of the expenditures.

H. Non-Revenues - Non-revenues are categories of monies that are not generated by traditional activities such as taxes, fees for services, or intergovernmental transfers from State to County. Included are such groupings as transfers, bond proceeds, insurance proceeds and unspent budgets and interest earned by Constitutional Officers which must, by State law, be returned to the County. Estimates are based on history or on anticipated transactions such as bond issuances.

I. Less 5% Anticipated Revenues - State law requires that budgeted collections for ad valorem (property tax) revenues be set at not less than 95% of estimates projected by the Tax Collector, and that receipts generally, except for fund balances brought forward, be budgeted at 95% of anticipated levels.

EXPENDITURES ARE DIVIDED INTO THE FOLLOWING CATEGORIES:

H. Internal Services - Expenditures incurred by one County department for services requested by another County department. Risk Management (Insurance Fees) is an example of an internal service expenditure.

I. Non-Expenditure Disbursements - Included in this category are transfers, reserves and transfer to constitutional officers. Interfund transfers represent amounts transferred from one fund to another to assist in financing the services of the recipient fund. Transfers do not constitute additional revenues or expenditures of the governmental unit, but reflect the movement of cash from one fund to another. Transfers to constitutional officers are disbursements to the constitutional officers (Sheriff, Supervisor of Elections and Clerk of the Circuit Court).

The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, liabilities, fund equity, revenues and expenditures, or expenses as appropriate. Government resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled.

FUND BALANCE – A term used to express the equity (assets minus liabilities and other uses) of governmental fund types and trust funds. These funds may be designated for a particular purpose. They govern the form and content of the basic financial statements of an entity. INTERNAL SERVICE CHARGES – The Risk Management program generates revenue to fund the program by billing the departments for services provided. Revenues are determined by agency requirements, which are determined in the budget review process. The expenditure to the department is an example of an Internal Service Charge. The use of an internal service fund enhances cost accounting and accountability for this in-house service; however, since expenditures are counted in both the originating department and in the

internal service fund, this results in a double count of the expenditures.

INTERNAL SERVICE FUND – A fund used to account for the financing of goods or services provided by one department to other departments on a reimbursement basis.

LEGISLATIVE PUBLIC HEARINGS – The purpose of a legislative public hearing is to obtain public input on legislative decisions on matters of policy. Legislative public hearings are required by state law when a city or county addresses such matters as comprehensive land use plans or the annual or biennial budget. Legislative public hearings are generally less formal than

quasi-judicial public hearings. They do not involve the legal rights of specific, private parties in a contested setting, but rather affect a wider range of citizens or perhaps the entire jurisdiction.

The wisdom of legislative decisions reached as a result of such hearings is not second-guessed by the courts; if challenged, they are reviewed only to determine if they are constitutional or violate state law. For example, a court will not review whether the basic budgetary decisions made by a city council or county commission were correctly made. On the other hand, comprehensive plans in Growth Management Act (GMA) counties may be reviewed by a growth management hearings board, and maybe later by a court, for consistency with the GMA.

LESS 5% ANTICIPATED REVENUES – State law requires that budgeted collections for ad valorem (property tax) revenues be set at not less than 95% of estimates projected by the Tax Collector, and that receipts generally, except for fund balances brought forward, be budgeted at 95% of anticipated levels.

MILLAGE RATE – A rate expressed in thousands. As used with ad valorem (property) taxes, the rate expresses the amount of tax per one thousand dollars of taxable values.

Under it, revenues are recognized when they become both measurable and available to finance expenditures of the current period. Expenditures are recognized when the related fund liability is incurred except for: (1.) Inventories of materials and supplies which may be considered expenditures either when purchased or when used; (2.) Prepaid insurance and similar items which need not be reported; (3.) Accumulated unpaid vacation, sick pay, and other employee benefit amounts which need not be recognized in the current period, but for which larger-than-normal accumulations must be disclosed in the notes to the financial statements; (4.) Infrastructure includes the transmission media, including telephone lines, cable television lines, and satellites and antennas, and also the routers, aggregators, repeaters, and other devices that control transmission paths. – T –

TAX INCREMENT FINANCING (TIF) – A public financing method that is used as a subsidy for redevelopment, infrastructure and other community –improvement projects. TIF is a method to use future gains in taxes to subsidize current improvements, which are projected to create the conditions for said gains. The completion of a public or private project often results in an increase in the value of surrounding real estate, which generates additional tax revenue. Sales-tax revenue may also increase, and jobs may be added, although these factors and their multipliers usually do not influence the structure of TIF.

When an increase in site value and private investment generates an increase in tax revenues, it is the "tax increment." Tax increment financing dedicates tax increments within a certain defined district to finance the debt that is issued to pay for the project. TIF

was designed to channel funding toward improvements in distressed, underdeveloped, or underutilized parts of a jurisdiction where development might otherwise not occur. TIF creates funding for public or private projects by borrowing against the future increase in these property-tax revenues.

There are also exemptions for disability, government owned and non-profit owned property.

TAXES – Compulsory charges levied by a government for the purpose of financing services performed for the common benefit. This term does not include specific charges made against particular persons or property for current or permanent benefits such as special

Transfers do not constitute revenues or expenditures of the governmental unit but only of the individual funds. Thus, they are budgeted and accounted for separately from other revenues and expenditures.

TRUTH IN MILLAGE (TRIM) – A 1980 law enacted by the Florida legislature that changed the budget process for local taxing agencies. It was designed to keep the public informed about the taxing intentions of the various taxing authorities.

The Florida Truth In Millage Act serves to formalize the property tax levying process by requiring a specific method of tax rate calculation, form notice, public hearing requirements and advertisement specifications prior to the adoption of a budget tax rate.

The effect of TRIM is to inform taxpayers that their property taxes are changing (up or down), the cause (a change in the assessed value of

their property and / or an increase in the proposed spending level) and how the proposed new tax rate compares to the rate that would generate the same property tax dollars as the current year (the “rolled back” rate).
