

Survey Affidavit for a Fence

Date _____

Address _____

Parcel ID # _____

Permit # _____

I have submitted a building permit to install a fence at the above-identified property. There is a survey for the above-identified property dated _____, completed by _____, which was submitted with the permit application. I affirm that the survey still depicts the accurate location of all structures and other improvements on the above-identified property.

By signing this affidavit, I, _____, confirm that the content of the survey remains accurate and that the associated scaled plot plan, site plan, and/or schematic drawing submitted indicating the location of the fence was prepared consistent with the survey.

Further, I confirm the fence will comply with all Land Development Code requirements for location and height, and that the fence will be located within the parcel boundaries of the above-identified property. If the fence is not installed as represented on the scaled plot plan and/or site plan and/or schematic drawing; is not located within the boundaries of the subject property; or is within a drainage or utility easement without the appropriate authorization; I understand that I may be subject to a code violation.

I fully understand failure to comply with this affidavit may result in a code violation and may result in the requirement to remove the fence and other penalties.
